

## Opis elemenata

Korube ili "TT" ploče su napravljene od prednapregnutog betona. Koristi se za izgradnju ravnih i kosih krovova kao i međuspratnih konstrukcija. Za standardne module širine 205cm u ponudi su četiri visine elemenata H=30cm, H=40cm, H=50cm i H=60cm. Otpornost na požar do R60'.

## Montaža

Kod upotrebe kao krovnog pokrivača monolitizacija nije obavezna, na istu se polaze termo a potom i hidroizolacija. Prilikom izrade međuspratne konstrukcije predviđeno je da se preko koruba postavi stabilizujući sloj betona minimaln debljine 5cm, armiran mrežastom armaturom. Kod izvođenja stabilizujuće ploče, gornja površina se zaliva betonom klase ne manje od 30N/mm<sup>2</sup>, granulometrijskog sastava 0-12.

## Podaci Data Sheet

MATERIAL MATERIAL	KARAKTERISTIČNE ČVRSTOĆE N/mm <sup>2</sup> NOMINAL STRENGTH N/mm <sup>2</sup>
Beton Concrete	MB ≥ 55
Kablovi Tendons	fpk ≥ 1860
Čelik B500 Steel B500	σvk ≥ 430
Zavarena mrežna armatura Welded Reinforcement Net	σvk ≥ 390

## Description of elements

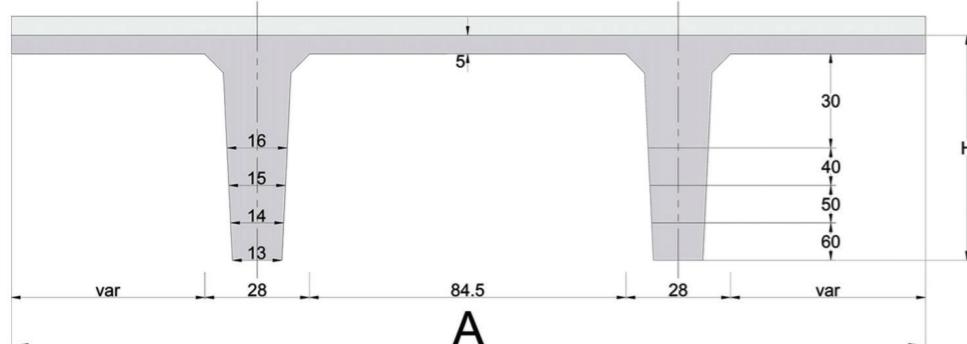

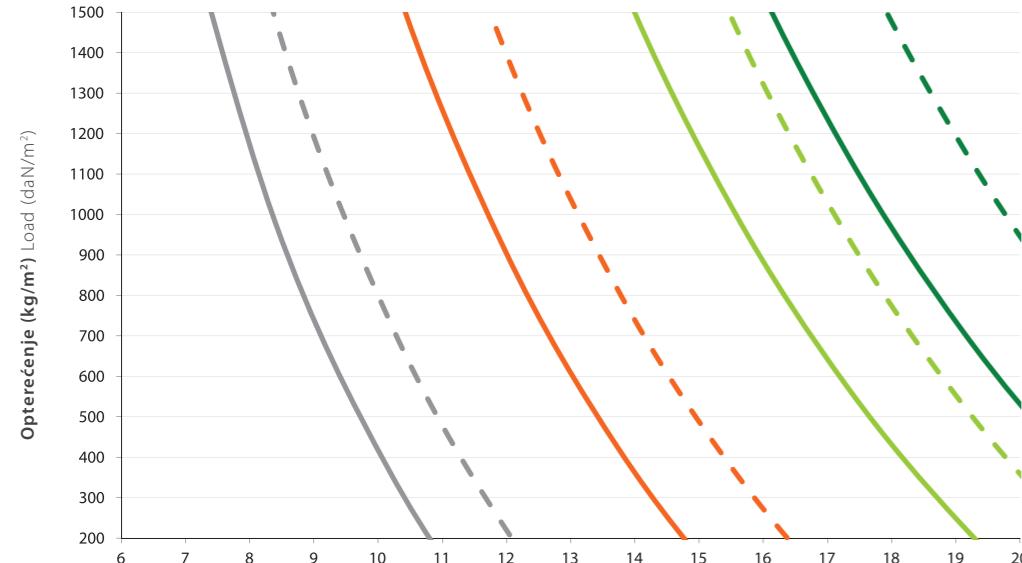

The ribbed slab systems or TT slabs are made of prestressed concrete. They are used for the construction of flat or pitched roofs and floor structures. For standard 250 cm modules, there are four element heights: H=30cm, H=40cm, H=50cm and H=60cm. Fire resistance R60'.

## Mounting

When TT slabs are used as roof coverings, monolithic casting is optional. Thermal insulation then waterproofing membrane are laid over them. When constructing floor slabs, a minimum 5 cm thick stabilizing layer of concrete reinforced with a wire mesh is to be cast over the TT slabs. To stabilize the slab, concrete of a minimum compressive strength 30N/mm<sup>2</sup> and particle size distribution 0-12 is to be cast over the upper surface.

### TT ploče (maks.opterećenje) TT Slabs (MAX LOAD)

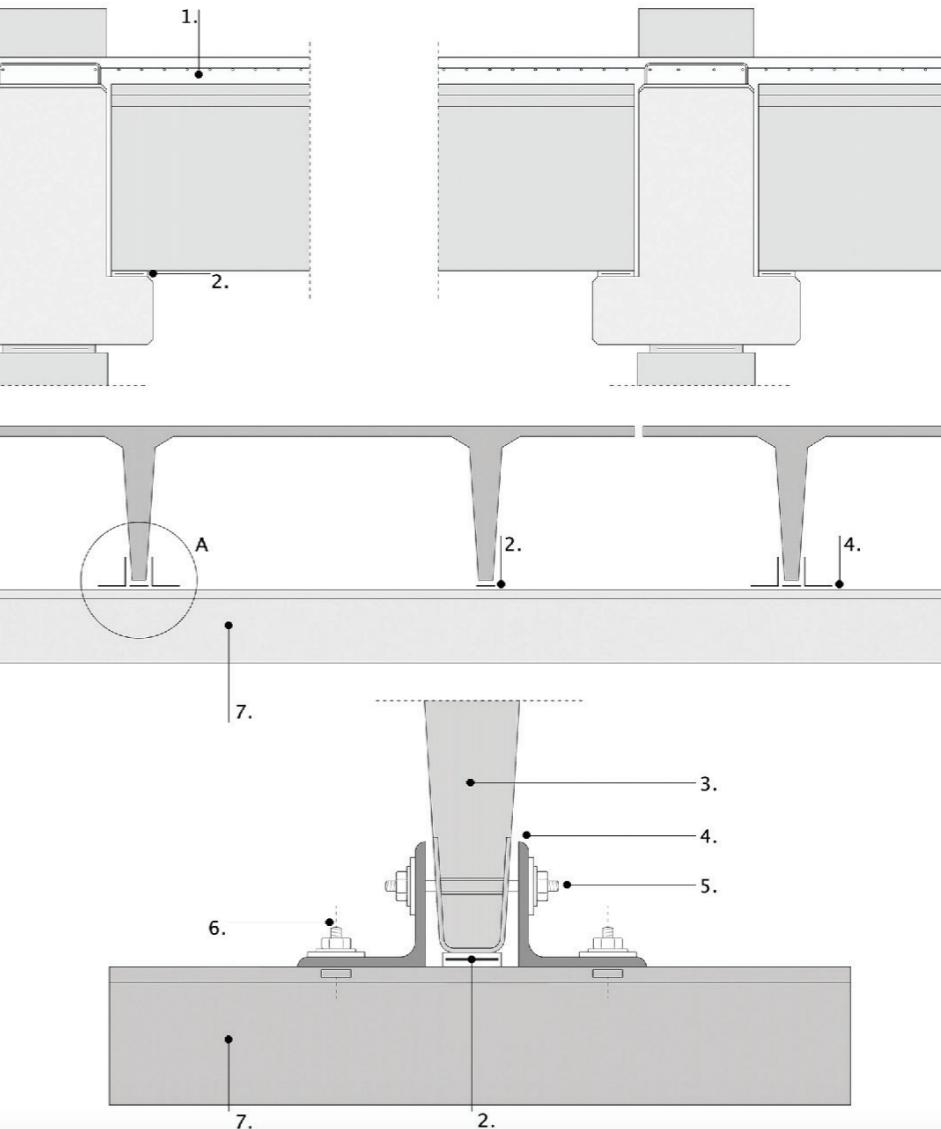

Visina H	Sopstvena težina A=245 cm kg/m <sup>2</sup> Dead Weight A=245 cm kg/m <sup>2</sup>
30	213
40	244
50	273
60	300

- TT 60 a=2,00m
- TT 60 a=2,45m
- TT 50 a=2,00m
- TT 50 a=2,45m
- TT 40 a=2,00m
- TT 40 a=2,45m
- TT 30 a=2,00m
- TT 30 a=2,45m

### Detalj montiranja Mounting detail

1. Monolitizacija Monolithic casting
2. Neoprensko ležište Neoprene pad
3. Rebro ploče Ribbed Slab
4. Ugaonik L Profile
5. Šipka sa navojima Threaded bar
6. Noseća greda Supporting beam
